RAYCO HAEX

FULL STACK WEB DEVELOPER

https://rayco.digital

hi@rayco.digital

https://calendly.com/rayco/digital-coffee

Deurne, Netherlands

PROFILE

I have 3 years of professional experience as a web developer. Most of it is within the E-commerce, industry and education fields. I focus on full stack, but would choose back-end if I had to choose. Lately, I developed a lot in scaling architectures on Azure and Google Cloud. This also includes optimising the architecture using tools like Redis and Elasticsearch. I bring a strategic approach to my work and deliver good results in both independent and collaborative environments.

WORK EXPERIENCE

Jun 2021 - Present
Full Stack Developer

CRAFT Education - flextime   Deurne, Brabant

Digitalising business processes with Laravel, built their website from the ground up using Craft CMS and building various plug-ins for Moodle in PHP. Also noteworthy, I supervise 2 interns starting Jan. 2023. Before the interns, I was the only developer at CRAFT Education. I succeeded in developing well rounded products by listening, researching & testing properly. This also shows I'm capable of working solo and holding myself accountable.

aug 2021 - jan 2022
Back-end PHP Developer

E-sites (Handpicked Agencies) - Internship   Breda

During my internship I built a greenfield translation management platform using Symfony, which was meant for internal use. It had the added ability to import XML & JSON localization files and read translations through a REST API.

Feb 2019 - Aug 2019
Front-end Developer

101Media - fulltime   Deurne, Brabant

Started as an Internship, followed up with a fulltime job throughout the summer vacation. During my time here I built multiple (WordPress) websites and helped solve support tickets.

Jul 2015 - present
(Hometaught) 3D generalist

Royalty based - freelance   Remote

Home taught interest turned into a passive income. I create curated content for Valve Corporation and fulfilled submissions for indiegame studios besides my study & other jobs. 3D design skill naturally expanded into some webdesign skill.

EDUCATION

Sept 2019 - Jan. 2024
Enterprise Software Engineer

Fontys Hogeschool (BSc)   Eindhoven

Applied system design to build fullstack web applications using ASP.NET Core. Created enterprise software both solo and in groups. Grades hovers between G(8) an O(10).

2016 - 2019
Apps & Media Developer

Gilde Opleidingen (MBO)   Venray

Here I first got introduced to web development and gradually learned to program OOP PHP and vanilla Javascript.
